

# PHILIPS TECHNICAL REVIEW

VOLUME 15  
1953-1954

PHILIPS RESEARCH LABORATORIES - EINDHOVEN

51  
P. 1228 418

# CONTENTS

## VOLUME 15, 1953/1954

---

### LIGHT

	Page		Page
The equivalent circuit of a gas discharge lamp, by C. Zwikker . . . . .	161	The specific light output of "Photoflux" flash- bulbs, by L. H. Verbeek . . . . .	317
Photometry at low luminance levels, by W. de Groot . . . . .	182	Photography of the eye with the aid of elec- tronic flash-tubes, by J. E. Winkelman and N. Warmoltz . . . . .	342

### TELECOMMUNICATIONS

A large-screen television projector, by J. Haantjes and C. J. van Loon . . . . .	27	A sinusoidal RC-oscillator for measurements in the frequency range 20-250 000 c/s, by J. D. Veegens and E. Prado . . . . .	240
The troposphere as a medium for the propa- gation of radio waves, by H. Bremmer, I . . . . .	148	An improved ion-trap magnet, by W. F. Niklas . . . . .	258
II . . . . .	175	A cold cathode gas-discharge tube as a switching element in automatic telephony, by J. Domburg and W. Six . . . . .	265
A signal generator for the testing of television receivers, by B. W. van Ingen Schenau . . . . .	205	Radio-controlled models, by A. H. Bruinsma . . . . .	281
The focusing of television picture-tubes with Ferroxdure magnets, by J. A. Verhoef . . . . .	214	A line converter for the international exchange of television programmes, by J. Haantjes and Th. G. Schut . . . . .	297
The flying-spot scanner by F. H. J. van der Poel and J. J. P. Valetton . . . . .	221	An instrument for measuring group delay, by H. J. de Boer and A. van Weel . . . . .	307
A cathode-ray tube for flying-spot scanning, by A. Bril, J. de Gier and H. A. Klasens . . . . .	233		

### X-RAYS AND NUCLEAR PHYSICS

The 15 million electron-volt linear electron accelerator for Harwell, by C. F. Bareford and M. G. Kelliher . . . . .	1	The Ferroxcube transformer core used in the Brookhaven Cosmotron, by F. G. Brockman and M. W. Louwerse . . . . .	73
A. Choice of parameters and general design . . . . .	2	A time-of-flight neutron spectrometer, by P. E. Trier, J. C. Hammerton and E. Wolfen- dale . . . . .	325
B. Detailed description of main components and circuits . . . . .	10		
C. Testing and performance . . . . .	22		

### SOUND

An electronic hearing aid, by P. Blom . . . . .	37	The principle of the magnetic recording and reproduction of sound, by W. K. Westmijze . . . . .	84
-------------------------------------------------	----	----------------------------------------------------------------------------------------------------	----

## MEASURING EQUIPMENT

Three methods of measuring magnetic fields,		An automatic recording potentiometer for industrial use, by H. J. Roosdorp . . . .	189
I. Measurement based on the generator principle, by B. F. Jürgens . . . . .	49	A signal generator for the testing of television receivers, by B. W. van Ingen Schenau . .	205
II. Measurement of the field on the axis of magnetic electron lenses, by A. C. van Dorsten and A. J. J. Franken . .	52	A sinusoidal RC-oscillator for measurements in the frequency range 20-250 000 c/s, by J. D. Veegens and E. Prado . . . . .	240
III. Measurement by the proton resonance method, by H. G. Beljers . . . . .	55	An instrument for measuring group delay, by H. J. de Boer and A. van Weel . . . . .	307
A pre-amplifier for use with electronic voltmeters and oscilloscopes, by F. G. Peuscher and J. van Holthoon . . . . .	169		

## MATERIALS AND THEIR RESEARCH

The efficiency of fluorescence in cathode-ray tubes, by A. Bril and H. A. Klasens . . .	63	Preparation and casting of metals and alloys under high vacuum, by J. D. Fast, A. I. Luteijn and E. Overbosch . . . . .	114
The Ferroxcube transformer core used in the Brookhaven Cosmotron, by F. G. Brockman and M. W. Louwerse . . . . .	73	A remarkable etching of copper, by J. J. de Jong . . . . .	238
Metal-detectors, by E. Blasberg and A. de Groot . . . . .	97	Lattice imperfections and plastic deformation in metals, by H. G. van Bueren,	
Imperfections in matter, by G. W. Rathenau	105	I. Nature and characteristics of lattice imperfections, notably dislocations . .	246
		II. Behaviour of lattice imperfections during deformation . . . . .	286

## MISCELLANEOUS

Metal-detectors, by E. Blasberg and A. de Groot . . . . .	97	The equivalent circuit of a gas discharge lamp, by C. Zwicker . . . . .	161
Imperfections in matter, by G. W. Rathenau	105	An apparatus for protection against dangerous voltages in welding equipment, by F. H. de Jong and D. W. van Rheenen . . . . .	199
The determination of droplet size in arc welding by high-speed cinematography, by P. C. van der Willigen and L. F. Defize . . . .	122	Radio-controlled models, by A. H. Bruinsma	281
Modern casting techniques, by H. J. Meerkamp van Embden . . . . .	133		

## BOOK REVIEWS

C. Zwicker (Editor), Fluorescent lighting. .	129	G. D. Rieck and L. H. Verbeek, Artificial light and photography . . . . .	188
P. J. Oranje, Gas discharge lamps . . . . .	129	N. S. Markus and J. Otte, Data and circuits of radio receiver and amplifier valves . . .	213
F. Kerkhof and W. Werner, Television. . .	146	H. Zijl, Manual for the illuminating engineer on large size perfect diffusers . . . . .	262
A. G. W. Uitjens, Television receiver design, I: I.F. stages . . . . .	147
